

Business Card(2.0)

=

Create your own at AgileCODES

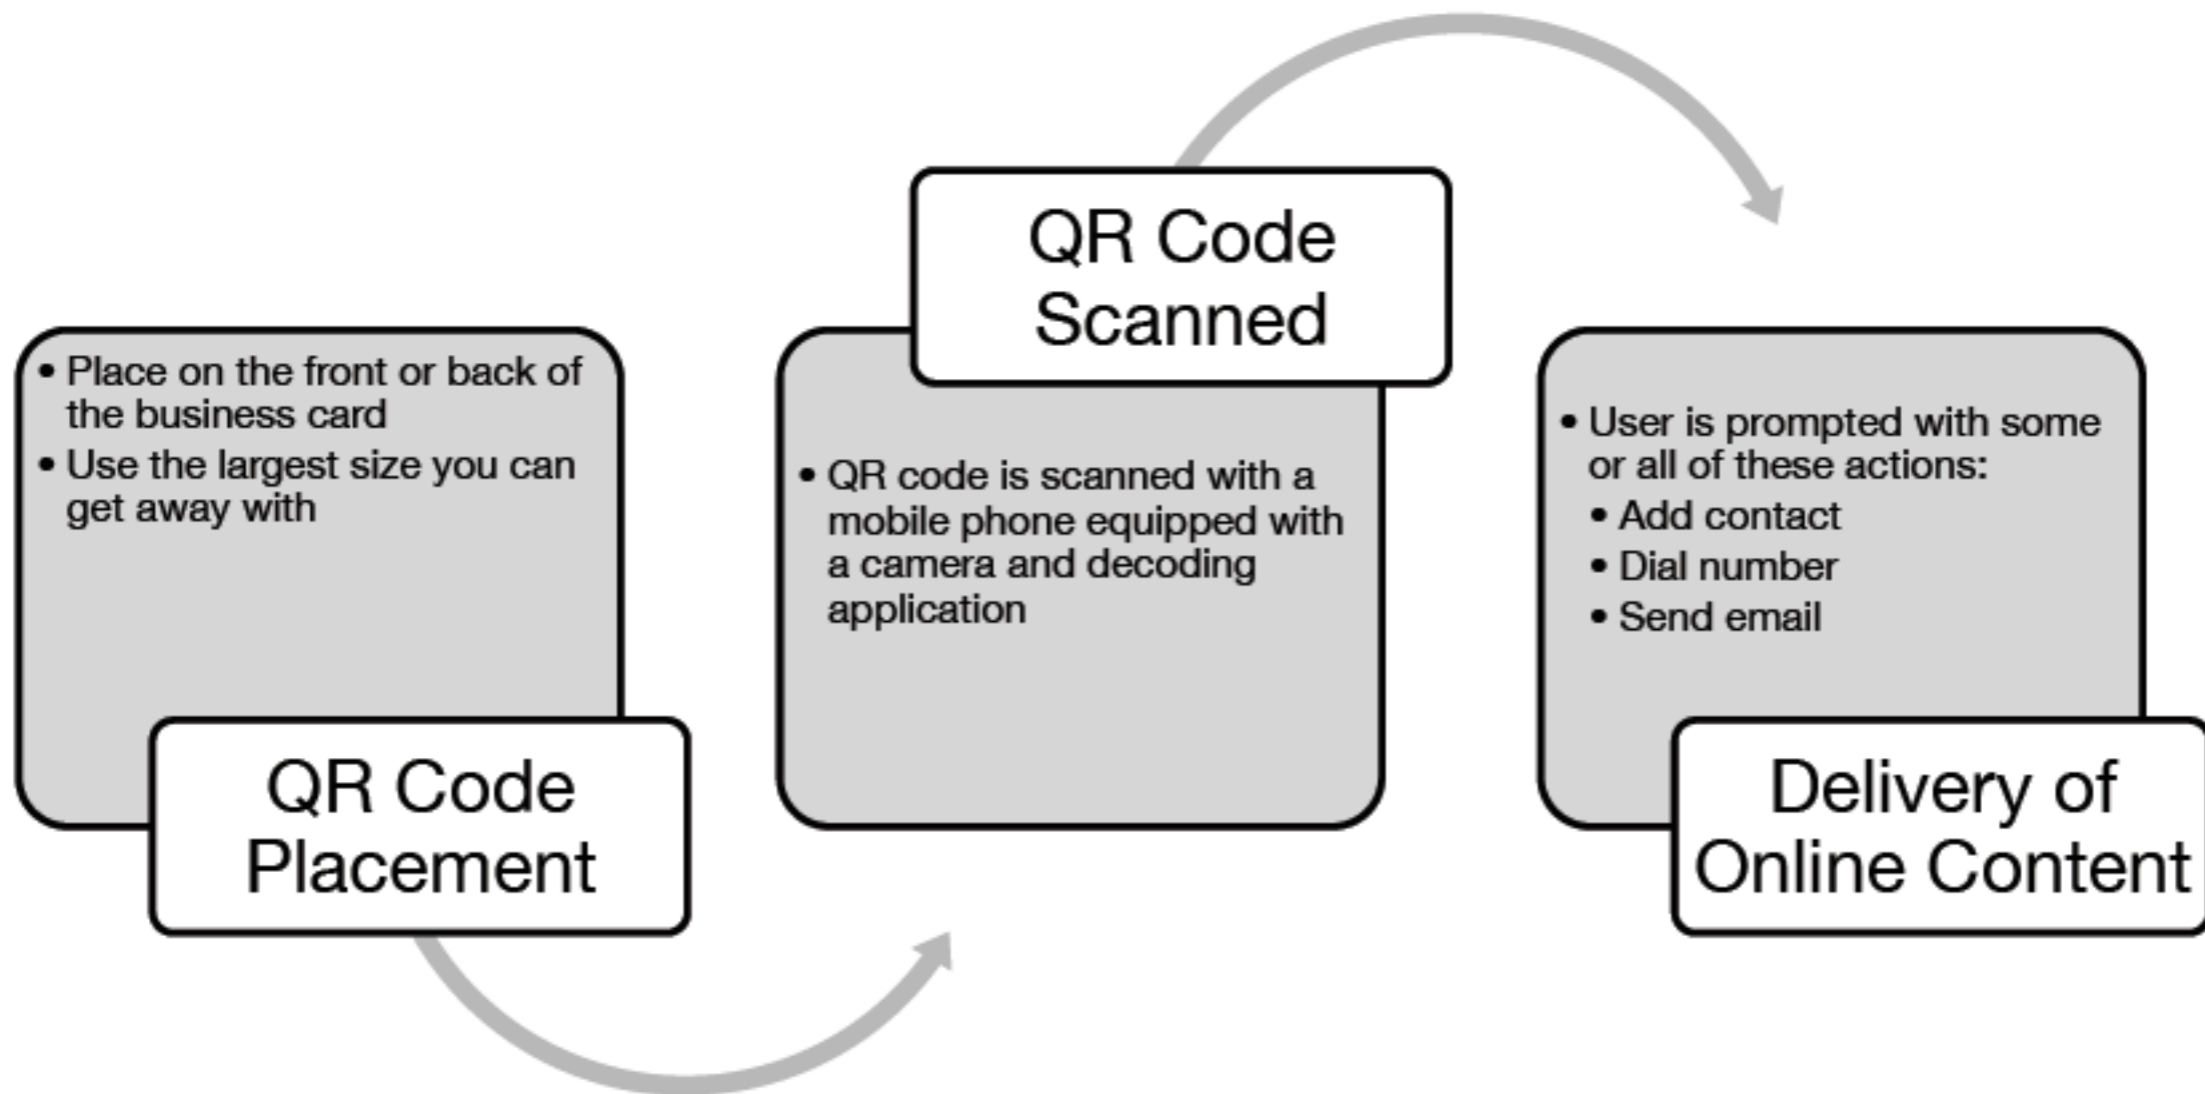

Vital Info Only for Readability/Compatibility

Stick to the Basics and Only include Your:

- First and Last Name
 - Email Address
 - Primary Phone Number
 - Your Company URL
- Minimal information increases scan success rates.
- Some phones camera may have minimal capabilities.

How Content info Embedded QR Codes Work

Creating a QR code with vCard Embedded

- 1- Select “vCard” at AgileCODEs - QR Code generator.
- 2- Enter first and lastname, email and phone number. Follow the KISS principle at first.
- 3- Generate your QR Code and add it to your business card. Be sure to test the code on your printer proofs.
